CHARACTERISTICS

- Enjoy increased control, adaptability, and flexibility
- Customize the workload according to your wishes
- Enhance your virtual cycling experience
- Sprint buttons for explosive power
- Improve your performance in E-cycling and virtual cycling.
- Fine-tune your training

Description

GEAR SHIFTERS & SPRINT BUTTONS

ELECTRONIC SHIFTERS

The electronic shifters, customized for the LC6, provide you with simple and intuitive adjustment of the workload during your workout. The right shifter increases the workload, while the left shifter decreases it. With two different pressure commands - single-click and press-and-hold - you can customize the workload according to your needs and maximize your training. Single-click: Increase or decrease the workload in steps (default is 25W/0.25kp) Press-and-hold: A single-click change followed by continuous increase/decrease of 50 W/0.5kp until the button is released.

SPRINT BUTTON

The sprint buttons are an additional feature in the E-sports package for the LC6 that give you even more control over your training experience. These buttons are particularly useful when you want to make quick and effective changes to the workload during high-intensity workouts or when you need to increase your pace in a virtual cycling race.

Features of the sprint buttons:

- **Click function:** With just a click (no press-and-hold), the cyclist can set the steps they want. The sprint buttons can then, for example, shift up/down by 2 kp/200 watts, regardless of the current workload, but 7 kp is always the maximum.
- **Direct shifting:** The function jumps directly to the preset value. The sprint buttons shift directly to, for example, 7 kp with the right button and directly to 3 kp with the left button. The function always takes into account the profile of the course and does not interrupt the simulation from Zwift or other virtual training platforms.
- **Combined function:** The sprint buttons function as shifters, which means they can be used for both single-click AND press-and-hold, depending on the cyclist's preferences and training needs.

SOFTWARE

The included software gives you the ability to configure and customize the functions of both the electronic shifters and the sprint buttons. Adjust the power or resistance for each click or press-and-hold to create a tailored training experience. This flexibility allows you to fine-tune your training to meet your unique goals and challenges.

CUSTOMIZED TRAINING

By upgrading your LC6 with the E-sport package from Monark Sports & Medical, you gain greater control over your training session and can fully utilize your LC6 for E-cycling or virtual cycling. Customize your workload settings to optimize your training and challenge yourself on the way to your goals. The customizable software gives you the ability to tailor your training experience and ensures that you get the most out of your investment in the LC6.

Gear shifters & Sprint buttons

INVEST IN THE E-SPORT PACKAGE

Invest in the E-sport package with gear shifters and sprint buttons and experience the difference in your training. Enjoy increased control, adaptability, and flexibility as you reach new heights in your cycling training. With customizable features and included software, you can create a personal training environment that helps you improve your performance in E-cycling and virtual cycling.

UPGRADE YOUR LC6 TO AN EXCITING E-SPORT ERGOMETER

Upgrade your LC6 to an exciting E-sport ergometer with the exclusive E-sport package, which includes intuitive electronic shifters and sprint buttons for quick and easy customization of your training. Give yourself an advantage in the virtual cycling world and get more out of your Vo2max and CPET tests by taking your LC6 to the next level.

SMOOTH SHIFTING AND CUSTOMIZATION

The electronic shifters specially designed for the LC6, allow you to adjust the workload quickly and easily during your training session. With a simple click, you can increase or decrease the load, and with the press-and-hold function, you can make larger adjustments to optimize your training session.

SPRINT BUTTONS FOR EXPLOSIVE POWER

With the sprint buttons, you can quickly change the load during intense training moments or when you need to increase the pace in a virtual race. You can also customize the sprint buttons' functions to suit your personal preferences and training needs.

SOFTWARE THAT PROVIDES FLEXIBILITY

The included software package allows you to customize and configure both the electronic shifters and sprint buttons to suit your unique training goals and challenges. Create a personalized training experience and get the most out of your LC6 investment.

ENHANCE YOUR VIRTUAL CYCLING EXPERIENCE

By upgrading your LC6 with the E-sport package, you get an unbeatable combination of performance and customization to maximize your training in E-cycling and virtual cycling. Give yourself an edge against competitors and achieve your training goals with this amazing accessory.

Invest in the E-sport package today and change your training forever!
The upgrade requires your LC6 to be equipped with the Novo Duo display.
